#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 1. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oshika (# JP 2002-169484) in view of Shigehiro et al. (# US 2003/0099027).

Oshika discloses an image display apparatus including an image display unit having an image display surface (element: 3, figure: 2); an image forming unit for forming an image on said image display surface by ejecting ink droplets toward said image display surface (element: 4, figure: 2, [0015]); and an image erasing unit for erasing the formed image (element: 5, figure: 2; [0010]). They also disclose that at least one of the ink holding regions holds one ink droplet for image formation ([0015]-[0023]).

Oshika differs from the claim of the present invention is that the ink holding regions for holding ink droplets impinged to the image display surface and an ink repelling region for holding no ink are formed on said image display surface, and said ink holding regions are regularly arranged so that each ink holding region is surrounded by said ink repelling region. (2) Each of said ink holding regions are a region subjected to ink receptive treatment and said ink-repelling region is a region subjected to ink repellent treatment. (3) The ink holding regions holds plural ink droplets for image

formation. (4) The ink holding regions holds a part of one ink droplet, whose remaining parts are held by adjacent ink holding regions, for image formation.

Shigehiro et al. teaches that an image forming apparatus includes an image carrier, a means for forming colorant holding regions on the image carrier and colorant repelling region, the colorant holding regions having better ink, a means for supplying colorant to the colorant holding region (see Abstract; [0020]-[0022]). They also teach that each of the ink holding regions is a region subjected to ink receptive treatment and the ink-repelling region is a region subjected to ink repellent treatment ([0010], [0020]-[0022], [0047]). The ink holding regions holds plural ink droplets (pixels) for image formation (see figure: 1-16, [0020]-[0022], [0115], [0148]). The ink holding regions holds a part of one ink droplet, whose remaining parts are held by adjacent ink holding regions, for image formation (figure: 1-16).

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the image display apparatus of Oshika by the aforementioned teaching of Shigehiro et al. in order to have a high contrast image and has improved image-holding property.

## Response to Arguments

2. Applicant's arguments with respect to claims 1-5 have been considered but are most in view of the new ground(s) of rejection.

Application/Control Number: 10/776,506

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manish S. Shah whose telephone number is (571) 272-2152. The examiner can normally be reached on 8:00am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen D. Meier can be reached on (571) 272-2149. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
